Minitube and TherioConsult present:

Male Canine Reproductive Physiology and Semen Handling

- Online Training Courses -

Topics include

- Chapter 1: Reproductive Physiology and Semen Collection of Dogs
- Chapter 2: Canine Semen Evaluation (motility, morphology and special evaluations)
- Chapter 3: Canine Semen Preservation (fresh, chilled and frozen semen)

Objectives of the course

At the conclusion of this course, participants will be able to:
- Identify and describe the reproductive structures and physiology of the male dog
- Discuss all processes that occur from semen collection to preservation
- Apply key management techniques to improve reproductive performance

Course presentation

This educational course has been designed for breeders and veterinarians, to provide them with state-of-the-art methodology and eye-opening insights with an interactive platform that is easy to use and affordable. The course provides the tools and know-how to improve the management and effectiveness of dog reproduction enterprises including optimised consultation of clients.

Chapters can be completed at your own pace, repeated, re-evaluated or skipped if already mastered.

All classes are available on-line and can be accessed via computer, tablet or smartphone at any time. Source material (PDFs, images or videos) can be downloaded for each lecture.
